

Secure Your PaySimati Wallet: Google Authenticator Setup Guide

Follow these quick steps to protect your **PaySimati** wallet with Google Authenticator (GA). It's simple, fast, and totally secure.

STEP 1: Download the App

- Open Google Play (Android) or App Store (iPhone)
- Search for Google Authenticator and install it
- Sign in using your Gmail account (keeps your codes safe if you change phones)

STEP 2: Get Your PaySimati Code

- Open **PaySimati** app
- Go to the screen that shows your Google Authenticator setup code
 - This comes after entering login and PIN/Password details

STEP 3: Add the Code to Google Authenticator

- Open the GA app and tap +
- Choose "Enter a setup key"
- Paste your code into the "Your key" field
- Choose "Time-based" if asked
- Name the account (e.g., "**PaySimati**")

STEP 4: Use the 6-Digit Code

- Google Authenticator will now show a 6-digit code that changes every 30 seconds
- Copy the code before it refreshes
- Go back to the **PaySimati** app and paste it in

 If the code changes too soon, wait and try the next one.

STEP 5: Complete Setup

- Once **PaySimati** accepts your code, tap "Finish" to complete login

Need Help?

- Didn't work? Try these:
 - Wait for the next code and try again
 - Restart the process with a new setup code from **PaySimati**

QUICK CHECKLIST

-  GA app installed
-  Gmail account linked
-  **PaySimati** setup code copied
-  Code added to GA
-  6-digit code pasted into **PaySimati**
-  Logged in successfully!

Your wallet is now protected with an extra layer of security.

 **PaySimati | Safe. Simple. Smart.**
